Open the Settings menu, choose Wi-Fi, and connect to the “ApplyPISDGuest”
Wi-Fi network

This guest portal is to request access to the Pearland ISD wireless network. Your guest username and password for accessing the "pearlandisd" WiFi network will be sent by text to your cell phone after completing the registration form. Guest internet access will be limited. Pearland staff and students should use their existing login information to gain full access to "pearlandisd" WiFi network and should not apply for the guest accounts.

**When this menu appears, click on the red button.
(If this screen does not automatically pop up, open your browser)**

TERMS OF USE:

land Independent School District provides a variety of electronic communications systems for educational purposes. The electronic communications system is defined as the District's network (including the wireless network), servers, computer workstations, mobile technologies, peripherals, databases, online resources, Internet access, and any other technology designated for use, including all new technologies as they become available. This also includes any access to the land ISD electronics system while on or near school property, in school vehicles and at school sponsored activities, and includes the appropriate use of district technology resources via off-campus or remote access. Please note that the Internet is a network of many types of communication and

Open your browser. In this form, fill in your guest username and password, and check the checkbox. Then click "Connect."

You should now be connected to our network.
