Wifi Setup Instructions
Open the Settings menu
Click on the Wi-Fi icon, and choose the “ApplyPISDGuest” network
This guest portal is to request access to the Pearland ISD wireless network. Your guest username and password for accessing the "pearlandisd" WiFi network will be sent by text to your cell phone after completing the registration form. Guest internet access will be limited. Pearland staff and students should use their existing login information to gain full access to "pearlandisd" WiFi network and should not apply for the guest accounts.

When you see this screen, click on the red button

Might have to open browser to see this.
Fill out the registration form, choose Send Notification Option(s), and click Submit.

User Name is automatically set, but it can be customized on this screen. Have visitor record their user name.

Send Notification can be email, text message, or both, but the guest must have an alternate way to check their personal email or receive text messages.

Click “Submit”
This screen verifies guest account creation.

An additional notification will be sent based on the options chosen before.
Click “Done”
This guest portal is to request access to the Pearland ISD wireless network.
